

SN65C116xE Dual Differential Drivers and Receivers With ± 15 -kV ESD Protection

1 Features

- Meet or Exceed Standards TIA/EIA-422-B and ITU Recommendation V.11
- Operate From Single 5-V Power Supply
- ESD Protection for RS-422 Bus Pins
 - ± 15 -kV Human-Body Model (HBM)
 - ± 8 -kV IEC 61000-4-2, Contact Discharge
 - ± 8 -kV IEC 61000-4-2, Air-Gap Discharge
- Low Supply-Current Requirements: 9 mA Maximum
- Low Pulse Skew
- Receiver Input Impedance . . . 17 k Ω (Typical)
- Receiver Input Sensitivity . . . ± 200 mV
- Receiver Common-Mode Input Voltage Range of -7 V to $+7$ V
- Glitch-Free Power-Up/Power-Down Protection
- Receiver 3-State Outputs Active-Low Enable (SN65C1167E Only)

2 Applications

- AC and Servo Motor Drives
- Factory Automation and Control
- Wireless Infrastructure

3 Description

The SN65C1167E and SN65C1168E consist of dual drivers and dual receivers with ± 15 -kV ESD (Human Body Model [HBM]) and ± 8 -kV ESD (IEC61000-4-2 Air-Gap Discharge and Contact Discharge) for RS-422 bus pins. The devices meet the requirements of TIA/EIA-422-B and ITU recommendation V.11.

The SN65C1167E combines dual 3-state differential line drivers and 3-state differential line receivers, both of which operate from a single 5-V power supply. The driver and receiver have active-high and active-low enables, respectively, which can be connected together externally to function as direction control.

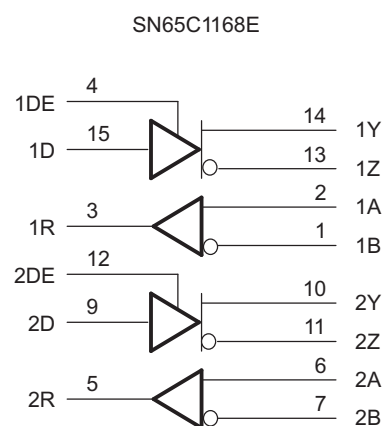

SN65C1168E drivers have individual active-high enables.

Device Information⁽¹⁾

PART NUMBER	PACKAGE	BODY SIZE (NOM)
SN65C116xE	SO (16)	10.30 mm \times 5.30 mm
	TSSOP (16)	5.00 mm \times 4.40 mm
	VQFN (16)	4.00 mm \times 3.50 mm

(1) For all available packages, see the orderable addendum at the end of the data sheet.

4 Revision History

NOTE: Page numbers for previous revisions may differ from page numbers in the current version.

Changes from Revision A (April 2007) to Revision B	Page
• Added <i>ESD Ratings</i> table, <i>Feature Description</i> section, <i>Device Functional Modes</i> , <i>Application and Implementation</i> section, <i>Power Supply Recommendations</i> section, <i>Device and Documentation Support</i> section, and <i>Mechanical, Packaging, and Orderable Information</i> section	1
• Changed the Rise Time Max value From: 10 ns To: 8 ns in the <i>Driver Section Switching Characteristics</i> table.....	8
• Changed the Fall Time Max value From: 10 ns To: 8 ns in the <i>Driver Section Switching Characteristics</i> table	8
• Added Maximum switching frequency to the <i>Driver Section Switching Characteristics</i> table	8

5 Pin Configuration and Functions

Pin Functions, SN65C1167E

NAME	PIN			I/O	DESCRIPTION
	SO	TSSOP	VQFN		
1A	2	2	2	I	RS422 differential input (noninverting) to receiver 1
2A	6	6	6	I	RS422 differential input (noninverting) to receiver 2
1B	1	1	1	I	RS422 differential input (inverting) to receiver 1
2B	7	7	7	I	RS422 differential input (inverting) to receiver 2
1D	15	15	15	I	Logic data input to RS422 driver 1
2D	9	9	9	I	Logic data input to RS422 driver 2
DE	12	12	12	I	Driver enable (active high)
GND	8	8	8	—	Device ground pin
1R	3	3	3	O	Logic data output of RS422 receiver 1
2R	5	5	5	O	Logic data output of RS422 receiver 2
$\overline{\text{RE}}$	4	4	4	I	Receiver enable pin (active low)

6 Specifications

6.1 Absolute Maximum Ratings

over recommended operating free-air temperature range (unless otherwise noted) ⁽¹⁾

		MIN	MAX	UNIT		
V _{CC}	Supply voltage ⁽²⁾	-0.5	7	V		
V _I	Input voltage	Driver, DE, RE	-0.5	7	V	
		A or B, Receiver	-14	14		
V _{ID}	Differential input voltage ⁽³⁾	Receiver	-14	14	V	
V _O	Output voltage	Driver	-0.5	7	V	
		Receiver	-0.5	V _{CC} + 0.5		
I _{IK}	Input clamp current	Driver, V _I < 0		-20	mA	
I _{OK}	Output clamp current	Driver, V _O < 0		-20	mA	
		Receiver		±20		
I _O	Output current	Driver		±150	mA	
		Receiver		±25		
I _{CC}	Supply current			200	mA	
		GND current		-200		
T _J	Operating virtual junction temperature			150	°C	
θ _{JA}	Package thermal impedance ⁽⁴⁾ ⁽⁵⁾	NS package		64	°C/W	
		PW package		108		
		RGY package		39		
T _A	Operating free-air temperature			-40	85	°C
T _{stg}	Storage temperature			-65	150	°C

- (1) Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
- (2) All voltage values except differential input voltage are with respect to the network GND.
- (3) Differential input voltage is measured at the noninverting terminal, with respect to the inverting terminal.
- (4) Maximum power dissipation is a function of T_{J(max)}, θ_{JA}, and T_A. The maximum allowable power dissipation at any allowable ambient temperature is P_D = (T_{J(max)} - T_A)/θ_{JA}. Selecting the maximum of 150°C can affect reliability.
- (5) The package thermal impedance is calculated in accordance with JESD 51-7.

6.2 Driver Output and Receiver Input ESD Ratings

		VALUE	UNIT	
V _(ESD)	Electrostatic discharge	Human-body model (HBM), per ANSI/ESDA/JEDEC JS-001 ⁽¹⁾	±15000	V
		Charged-device model (CDM), per JEDEC specification JESD22-C101 ⁽²⁾	±1000	
		IEC 61000-4-2, air-gap discharge	±8000	
		IEC 61000-4-2, contact discharge	±8000	

- (1) JEDEC document JEP155 states that 500-V HBM allows safe manufacturing with a standard ESD control process.
- (2) JEDEC document JEP157 states that 250-V CDM allows safe manufacturing with a standard ESD control process.

6.3 Recommended Operating Conditions

		MIN	NOM	MAX	UNIT
V _{CC}	Supply voltage	4.5	5	5.5	V
V _{IC}	Common-mode input voltage ⁽¹⁾			±7	V
V _{ID}	Differential input voltage			±7	V
V _I	Input voltage	0		5.5	V
V _O	Output voltage	0		V _{CC}	V
V _{IH}	High-level input voltage	2			V
V _{IL}	Low-level input voltage			0.8	V
I _{OH}	High-level output current	Receiver		–6	mA
		Driver		–20	
I _{OL}	Low-level output current	Receiver		6	mA
		Driver		20	
T _A	Operating free-air temperature	–40		85	°C

(1) Refer to TIA/EIA-422-B for exact conditions.

6.4 Thermal Information

THERMAL METRIC ⁽¹⁾	SN65C116xE			UNIT	
	SO (NS)	PW (TSSOP)	RGY (VQFN)		
	16 PINS	16 PINS	16 PINS		
R _{θJA}	Junction-to-ambient thermal resistance	74.9	98.9	42.8	°C/W
R _{θJC(top)}	Junction-to-case (top) thermal resistance	33.7	32.9	35.3	°C/W
R _{θJB}	Junction-to-board thermal resistance	37.1	44.6	18.5	°C/W
ψ _{JT}	Junction-to-top characterization parameter	6.1	1.9	0.5	°C/W
ψ _{JB}	Junction-to-board characterization parameter	36.6	44.1	18.4	°C/W
R _{θJC(bot)}	Junction-to-case (bottom) thermal resistance	n/a	n/a	3.3	°C/W

(1) For more information about traditional and new thermal metrics, see the *Semiconductor and IC Package Thermal Metrics* application report, [SPRA953](http://www.ti.com/lit/zip/Spra953).

6.5 Driver Section Electrical Characteristics

over recommended supply voltage and operating free-air temperature ranges (unless otherwise noted)

PARAMETER		TEST CONDITIONS	MIN	TYP ⁽¹⁾	MAX	UNIT
V _{IK}	Input clamp voltage	I _I = -18 mA			-1.5	V
V _{OH}	High-level output voltage	V _{IH} = 2 V, V _{IL} = 0.8 V, I _{OH} = -20 mA	2.4	3.5		V
V _{OL}	Low-level output voltage	V _{IH} = 2 V, V _{IL} = 0.8 V, I _{OL} = 20 mA		0.2	0.4	V
V _{OD1}	Differential output voltage 1	I _O = 0 mA	2		6	V
V _{OD2}	Differential output voltage 2	R _L = 100 Ω, See Figure 1 ⁽²⁾	2	3.7		V
Δ V _{OD}	Change in magnitude of differential output voltage	R _L = 100 Ω, See Figure 1 ⁽²⁾			±0.4	V
V _{OC}	Common-mode output voltage	R _L = 100 Ω, See Figure 1 ⁽²⁾			±3	V
Δ V _{OC}	Change in magnitude of common-mode output voltage	R _L = 100 Ω, See Figure 1 ⁽²⁾			±0.4	V
I _{O(OFF)}	Output current with power off	V _{CC} = 0 V			100	μA
		V _O = 6 V			100	
		V _O = -0.25 V			100	
I _{OZ}	High-impedance-state output current	V _O = 2.5 V			20	μA
		V _O = 5 V			-20	
I _{IH}	High-level input current	V _I = V _{CC} or V _{IH}			1	μA
I _{IL}	Low-level input current	V _I = GND or V _{IL}			-1	μA
I _{OS}	Short-circuit output current	V _O = V _{CC} or GND ⁽³⁾	-30		-150	mA
I _{CC}	Supply current (total package)	No load, Enabled			4	6
		V _I = V _{CC} or GND			5	9
		V _I = 2.4 or 0.5 V ⁽⁴⁾			5	9
C _i	Input capacitance				6	pF

(1) All typical values are at V_{CC} = 5 V and T_A = 25°C.

(2) Refer to TIA/EIA-422-B for exact conditions.

(3) Not more than one output should be shorted at a time, and the duration of the short circuit should not exceed one second.

(4) This parameter is measured per input, while the other inputs are at V_{CC} or GND.

6.6 Receiver Section Electrical Characteristics

over recommended ranges of common-mode input voltage, supply voltage, and operating free-air temperature (unless otherwise noted)

PARAMETER		TEST CONDITIONS	MIN	TYP ⁽¹⁾	MAX	UNIT
V _{IT+}	Positive-going input threshold voltage, differential input				0.2	V
V _{IT-}	Negative-going input threshold voltage, differential input		-0.2 ⁽²⁾			V
V _{hys}	Input hysteresis (V _{IT+} - V _{IT-})			60		mV
V _{IK}	Input clamp voltage, \overline{RE}	SN65C1167E I _I = -18 mA			-1.5	V
V _{OH}	High-level output voltage	V _{ID} = 200 mV, I _{OH} = -6 mA	3.8	4.2		V
V _{OL}	Low-level output voltage	V _{ID} = -200 mV, I _{OL} = 6 mA		0.1	0.3	V
I _{OZ}	High-impedance state output current	SN65C1167E V _O = V _{CC} or GND		±0.5	±5	μA
I _I	Line input current	Other input at 0 V			1.5	mA
		V _I = 10 V			-2.5	
		V _I = -10 V				
I _I	Enable input current, \overline{RE}	SN65C1167E V _I = V _{CC} or GND			±1	μA
r _i	Input resistance	V _{IC} = -7 V to 7 V, Other input at 0 V	4	17		kΩ
I _{CC}	Supply current (total package)	No load, Enabled			4	6
		V _I = V _{CC} or GND			5	9
		V _{IH} = 2.4 V or 0.5 V ⁽³⁾			5	9

(1) All typical values are at V_{CC} = 5 V and T_A = 25°C.

(2) The algebraic convention, where the less positive (more negative) limit is designated as minimum, is used in this data sheet for common-mode input voltage and threshold voltage levels only.

(3) Refer to TIA/EIA-422-B for exact conditions.

6.7 Driver Section Switching Characteristics

over recommended supply voltage and operating free-air temperature ranges (unless otherwise noted)

PARAMETER		TEST CONDITIONS	MIN	TYP ⁽¹⁾	MAX	UNIT
t_{PHL}	Propagation delay time, high- to low-level output	R1 = R2 = 50 Ω , C1 = C2 = C3 = 40 pF, See Figure 2		8	16	ns
t_{PLH}	Propagation delay time, low- to high-level output			8	16	ns
$t_{sk(p)}$	Pulse skew			1.5	4	ns
t_r	Rise time	R1 = R2 = 50 Ω , C1 = C2 = C3 = 40 pF, See Figure 3		5	8	ns
t_f	Fall time			5	8	ns
t_{PZH}	Output-enable time to high level	R1 = R2 = 50 Ω , C1 = C2 = C3 = 40 pF, See Figure 4		10	19	ns
t_{PZL}	Output-enable time to low level			10	19	ns
t_{PHZ}	Output-disable time from high level	R1 = R2 = 50 Ω , C1 = C2 = C3 = 40 pF, See Figure 4		7	16	ns
t_{PLZ}	Output-disable time from low level			7	16	ns
f_{SW}	Maximum switching frequency	R1 = R2 = 50 Ω , C1 = C2 = C3 = 40 pF, See Figure 3	20			MHz

(1) All typical values are at $V_{CC} = 5$ V and $T_A = 25^\circ\text{C}$.

6.8 Receiver Section Switching Characteristics

over recommended operating free-air temperature range (unless otherwise noted)⁽¹⁾

PARAMETER		TEST CONDITIONS	MIN	TYP ⁽²⁾	MAX	UNIT
t_{PLH}	Propagation delay time, low- to high-level output	See Figure 5	9	15	27	ns
t_{PHL}	Propagation delay time, high- to low-level output	See Figure 5	9	15	27	ns
t_{TLH}	Transition time, low- to high-level output	$V_{IC} = 0$ V, See Figure 5		4	9	ns
t_{THL}	Transition time, high- to low-level output			4	9	ns
t_{PZH}	Output-enable time to high level	SN65C1167E $R_L = 1$ k Ω , $C_L = 50$ pF See Figure 6		7	22	ns
t_{PZL}	Output-enable time to low level			7	22	ns
t_{PHZ}	Output-disable time from high level			12	22	ns
t_{PLZ}	Output-disable time from low level			12	22	ns

(1) Measured per input while the other inputs are at V_{CC} or GND

(2) All typical values are at $V_{CC} = 5$ V and $T_A = 25^\circ\text{C}$.

8 Detailed Description

8.1 Overview

The SN65C1167E and SN65C1168E consist of dual drivers and dual receivers powered from a single 5-V supply. These devices meet the requirements of TIA/EIA-422-B and ITU recommendation V.11.

8.2 Functional Block Diagram

Copyright © 2017, Texas Instruments Incorporated

8.3 Feature Description

8.3.1 Active High Driver Output Enables

Both drivers of SN65C1167E can be configured with the single DE logic input. Both drivers are set at high-impedance when disabled.

SN65C1168E drivers can be configured individually by 1DE and 2DE logic inputs. Both drivers are set at high-impedance when disabled.

8.3.2 Active Low Receiver Enables

Both SN65C1167E receivers can be configured with the single \overline{RE} logic input. Receiver logic outputs are set at high-impedance when disabled.

8.4 Device Functional Modes

Table 1 and Table 2 list the functional modes of SN65C1167E and SN65C1168E.

Table 1. Each Driver

INPUT D	ENABLE DE	OUTPUTS	
		Y	Z
H	H	H	L
L	H	L	H
X	L	Z	Z

Table 2. SN65C1167E, Each Receiver⁽¹⁾

DIFFERENTIAL INPUTS A–B	ENABLE RE	OUTPUT R
$V_{ID} \geq 0.2\text{ V}$	L	H
$-0.2\text{ V} < V_{ID} < 0.2\text{ V}$	L	?
$V_{ID} \leq -0.2\text{ V}$	L	L
X	H	Z
Open	L	H

(1) H = High level, L = Low level, ? = Indeterminate, X = Irrelevant, Z = High impedance (off)

$V_{ID} \leq -0.2\text{ V}$	L
Open	H

(1) H = High level, L = Low level, ? = Indeterminate

9 Application and Implementation

NOTE

Information in the following applications sections is not part of the TI component specification, and TI does not warrant its accuracy or completeness. TI's customers are responsible for determining suitability of components for their purposes. Customers should validate and test their design implementation to confirm system functionality.

9.1 Application Information

Figure 7 shows a typical RS-422 application. One transmitter is able to broadcast to multiple receiving nodes connected together over a shared differential bus. Twisted-pair cabling with a controlled differential impedance is used, and a termination resistance is placed at the farthest receive end of the cable in order to match the transmission line impedance and minimize signal reflections.

Figure 7. Schematic of Inputs

Application Information (continued)

Figure 8. Schematic of Outputs

9.2 Typical Application

Figure 9. Typical RS-422 Application

9.2.1 Design Requirements

A typical RS-422 implementation using SN65C116xE requires the following:

- 5 V power source.
- Connector that ensures the correct polarity for port pins.
- Cabling that supports the desired operating rate and transmission distance.

9.2.2 Detailed Design Procedure

Place the device close to bus connector to keep traces (stub) short to prevent adding reflections to the bus line. If desired, add external fail-safe biasing to ensure ± 200 mV on the A-B port when the driver circuit is disabled.

10 Power Supply Recommendations

Use a 5 V power supply for V_{CC} place 0.1- μ F bypass capacitors close to the power supply pins to reduce errors coupling in from noisy or high impedance power supplies.

11 Device and Documentation Support

11.1 Device Support

11.1.1 Third-Party Products Disclaimer

TI'S PUBLICATION OF INFORMATION REGARDING THIRD-PARTY PRODUCTS OR SERVICES DOES NOT CONSTITUTE AN ENDORSEMENT REGARDING THE SUITABILITY OF SUCH PRODUCTS OR SERVICES OR A WARRANTY, REPRESENTATION OR ENDORSEMENT OF SUCH PRODUCTS OR SERVICES, EITHER ALONE OR IN COMBINATION WITH ANY TI PRODUCT OR SERVICE.

11.2 Related Links

The table below lists quick access links. Categories include technical documents, support and community resources, tools and software, and quick access to sample or buy.

11.3 Receiving Notification of Documentation Updates

To receive notification of documentation updates, navigate to the device product folder on ti.com. In the upper right corner, click on Alert me to register and receive a weekly digest of any product information that has changed. For change details, review the revision history included in any revised document.

11.4 Community Resources

The following links connect to TI community resources. Linked contents are provided "AS IS" by the respective contributors. They do not constitute TI specifications and do not necessarily reflect TI's views; see TI's [Terms of Use](#).

TI E2E™ Online Community *TI's Engineer-to-Engineer (E2E) Community*. Created to foster collaboration among engineers. At e2e.ti.com, you can ask questions, share knowledge, explore ideas and help solve problems with fellow engineers.

Design Support *TI's Design Support* Quickly find helpful E2E forums along with design support tools and contact information for technical support.

11.5 Trademarks

E2E is a trademark of Texas Instruments.
All other trademarks are the property of their respective owners.

11.6 Electrostatic Discharge Caution

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

11.7 Glossary

SLYZ022 — *TI Glossary*.

This glossary lists and explains terms, acronyms, and definitions.

12 Mechanical, Packaging, and Orderable Information

The following pages include mechanical, packaging, and orderable information. This information is the most current data available for the designated devices. This data is subject to change without notice and revision of this document. For browser-based versions of this data sheet, refer to the left-hand navigation.

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

⁽²⁾ Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

⁽³⁾ MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

⁽⁴⁾ There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

⁽⁵⁾ Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

⁽⁶⁾ Lead/Ball Finish - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead/Ball Finish values may wrap to two lines if the finish value exceeds the maximum column width.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

PLASTIC SMALL OUTLINE

4040064-4/G 02/11

- NOTES:
- A. All linear dimensions are in millimeters. Dimensioning and tolerancing per ASME Y14.5M-1994.
 - B. This drawing is subject to change without notice.
 -  Body length does not include mold flash, protrusions, or gate burrs. Mold flash, protrusions, or gate burrs shall not exceed 0,15 each side.
 -  Body width does not include interlead flash. Interlead flash shall not exceed 0,25 each side.
 - E. Falls within JEDEC MO-153

PW (R-PDSO-G16)

PLASTIC SMALL OUTLINE

- NOTES:
- All linear dimensions are in millimeters.
 - This drawing is subject to change without notice.
 - Publication IPC-7351 is recommended for alternate designs.
 - Laser cutting apertures with trapezoidal walls and also rounding corners will offer better paste release. Customers should contact their board assembly site for stencil design recommendations. Refer to IPC-7525 for other stencil recommendations.
 - Customers should contact their board fabrication site for solder mask tolerances between and around signal pads.

RGY (R-PVQFN-N16)

PLASTIC QUAD FLATPACK NO-LEAD

4203539-3/1 06/2011

- NOTES:
- All linear dimensions are in millimeters. Dimensioning and tolerancing per ASME Y14.5M-1994.
 - This drawing is subject to change without notice.
 - QFN (Quad Flatpack No-Lead) package configuration.
 - The package thermal pad must be soldered to the board for thermal and mechanical performance.
 - See the additional figure in the Product Data Sheet for details regarding the exposed thermal pad features and dimensions.
 - Pin 1 identifiers are located on both top and bottom of the package and within the zone indicated. The Pin 1 identifiers are either a molded, marked, or metal feature.
 - Package complies to JEDEC MO-241 variation BA.

RGY (R-PVQFN-N16)

PLASTIC QUAD FLATPACK NO-LEAD

THERMAL INFORMATION

This package incorporates an exposed thermal pad that is designed to be attached directly to an external heatsink. The thermal pad must be soldered directly to the printed circuit board (PCB). After soldering, the PCB can be used as a heatsink. In addition, through the use of thermal vias, the thermal pad can be attached directly to the appropriate copper plane shown in the electrical schematic for the device, or alternatively, can be attached to a special heatsink structure designed into the PCB. This design optimizes the heat transfer from the integrated circuit (IC).

For information on the Quad Flatpack No-Lead (QFN) package and its advantages, refer to Application Report, QFN/SON PCB Attachment, Texas Instruments Literature No. SLUA271. This document is available at www.ti.com.

The exposed thermal pad dimensions for this package are shown in the following illustration.

 - C. Body dimensions do not include mold flash or protrusion, not to exceed 0,15.

IMPORTANT NOTICE

Texas Instruments Incorporated (TI) reserves the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete.

TI's published terms of sale for semiconductor products (<http://www.ti.com/sc/docs/stdterms.htm>) apply to the sale of packaged integrated circuit products that TI has qualified and released to market. Additional terms may apply to the use or sale of other types of TI products and services.

Reproduction of significant portions of TI information in TI data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such reproduced documentation. Information of third parties may be subject to additional restrictions. Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyers and others who are developing systems that incorporate TI products (collectively, "Designers") understand and agree that Designers remain responsible for using their independent analysis, evaluation and judgment in designing their applications and that Designers have full and exclusive responsibility to assure the safety of Designers' applications and compliance of their applications (and of all TI products used in or for Designers' applications) with all applicable regulations, laws and other applicable requirements. Designer represents that, with respect to their applications, Designer has all the necessary expertise to create and implement safeguards that (1) anticipate dangerous consequences of failures, (2) monitor failures and their consequences, and (3) lessen the likelihood of failures that might cause harm and take appropriate actions. Designer agrees that prior to using or distributing any applications that include TI products, Designer will thoroughly test such applications and the functionality of such TI products as used in such applications.

TI's provision of technical, application or other design advice, quality characterization, reliability data or other services or information, including, but not limited to, reference designs and materials relating to evaluation modules, (collectively, "TI Resources") are intended to assist designers who are developing applications that incorporate TI products; by downloading, accessing or using TI Resources in any way, Designer (individually or, if Designer is acting on behalf of a company, Designer's company) agrees to use any particular TI Resource solely for this purpose and subject to the terms of this Notice.

TI's provision of TI Resources does not expand or otherwise alter TI's applicable published warranties or warranty disclaimers for TI products, and no additional obligations or liabilities arise from TI providing such TI Resources. TI reserves the right to make corrections, enhancements, improvements and other changes to its TI Resources. TI has not conducted any testing other than that specifically described in the published documentation for a particular TI Resource.

Designer is authorized to use, copy and modify any individual TI Resource only in connection with the development of applications that include the TI product(s) identified in such TI Resource. NO OTHER LICENSE, EXPRESS OR IMPLIED, BY ESTOPPEL OR OTHERWISE TO ANY OTHER TI INTELLECTUAL PROPERTY RIGHT, AND NO LICENSE TO ANY TECHNOLOGY OR INTELLECTUAL PROPERTY RIGHT OF TI OR ANY THIRD PARTY IS GRANTED HEREIN, including but not limited to any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information regarding or referencing third-party products or services does not constitute a license to use such products or services, or a warranty or endorsement thereof. Use of TI Resources may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

TI RESOURCES ARE PROVIDED "AS IS" AND WITH ALL FAULTS. TI DISCLAIMS ALL OTHER WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, REGARDING RESOURCES OR USE THEREOF, INCLUDING BUT NOT LIMITED TO ACCURACY OR COMPLETENESS, TITLE, ANY EPIDEMIC FAILURE WARRANTY AND ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT OF ANY THIRD PARTY INTELLECTUAL PROPERTY RIGHTS. TI SHALL NOT BE LIABLE FOR AND SHALL NOT DEFEND OR INDEMNIFY DESIGNER AGAINST ANY CLAIM, INCLUDING BUT NOT LIMITED TO ANY INFRINGEMENT CLAIM THAT RELATES TO OR IS BASED ON ANY COMBINATION OF PRODUCTS EVEN IF DESCRIBED IN TI RESOURCES OR OTHERWISE. IN NO EVENT SHALL TI BE LIABLE FOR ANY ACTUAL, DIRECT, SPECIAL, COLLATERAL, INDIRECT, PUNITIVE, INCIDENTAL, CONSEQUENTIAL OR EXEMPLARY DAMAGES IN CONNECTION WITH OR ARISING OUT OF TI RESOURCES OR USE THEREOF, AND REGARDLESS OF WHETHER TI HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Unless TI has explicitly designated an individual product as meeting the requirements of a particular industry standard (e.g., ISO/TS 16949 and ISO 26262), TI is not responsible for any failure to meet such industry standard requirements.

Where TI specifically promotes products as facilitating functional safety or as compliant with industry functional safety standards, such products are intended to help enable customers to design and create their own applications that meet applicable functional safety standards and requirements. Using products in an application does not by itself establish any safety features in the application. Designers must ensure compliance with safety-related requirements and standards applicable to their applications. Designer may not use any TI products in life-critical medical equipment unless authorized officers of the parties have executed a special contract specifically governing such use. Life-critical medical equipment is medical equipment where failure of such equipment would cause serious bodily injury or death (e.g., life support, pacemakers, defibrillators, heart pumps, neurostimulators, and implantables). Such equipment includes, without limitation, all medical devices identified by the U.S. Food and Drug Administration as Class III devices and equivalent classifications outside the U.S.

TI may expressly designate certain products as completing a particular qualification (e.g., Q100, Military Grade, or Enhanced Product). Designers agree that it has the necessary expertise to select the product with the appropriate qualification designation for their applications and that proper product selection is at Designers' own risk. Designers are solely responsible for compliance with all legal and regulatory requirements in connection with such selection.

Designer will fully indemnify TI and its representatives against any damages, costs, losses, and/or liabilities arising out of Designer's non-compliance with the terms and provisions of this Notice.
